# DECLARATION

I have declare that the Internship report submitted along with the Internship entitled **Internship on PHP Laravel framework** submitted in partial fulfillment for the degree of Bachelor of Engineering in Computer Engineering to Gujarat Technological University, Ahmedabad, is a bonafide record of original internship work carried out by me at **Advait Soultion**. under the supervision of **Mr. Gaurav Patel** and that no part of this report has been directly copied from any students report or taken from any other source, without providing due reference.

Name of the Student | Signature of Student

Patel Soham N.

# ACKNOWLEDGEMENT

I express my deep sense of gratitude to **Mr. Gaurav Patel**for their kind cooperation and valuable guidance throughout the process of my work.

A special thanks to **Mr. Gaurav Patel** for their guidance and encouragement in carrying out this internship. I would also like to express my gratitude to the officials and other staff member of AdvaitSoultion who rendered their help during the period of myinternship.

The grateful thanks to **Prof. Dharmesh Purani**and Head of Department **Prof. Monali Panchal**, with other faculty members of Computer Engineering department, Bhagwan Arihant Institute of Technology, who always helped me by giving fruitful suggestions, support and encouragement which not only helped me in preparing this work but also in having a better insight in this field.

Lastly, I also extend my thanks and appreciation towards my family members, my friends, my classmates who have played a very important role in helping and strengthening me.

Patel Soham N.

# ABSTRACT

*The scope of this document is to identify and describe the analysis carried out, the internship completion and the experience gained as web developer intern. In this internship of PHP Laravel framework is allow you to develop a different kind of websites and webpages, which learn from the expert and also develop the webpages.Laravel is a free and open-source PHP web framework, which intended for the development of web applications following the model–view–controller (MVC) architectural pattern and based on Symfony (web application). Some of the features of Laravel are a modular packaging system with a dedicated dependency manager, different ways for accessing relational databases. Mini CRM to manage Companies and Their Employees which includes Basic Authentication, Database Design and creation in MYSQL, Create / Read / Delete and Update functionality for companies and Employees. To learn advance topic/tools related to Laravel Framework like database migration, Factory and Faker Class. This internship has allowed me to develop the skills, work habits, and attitudes needed for professional success.*

# CHAPTER – 1
# OVERVIEW OF THE COMPANY

## 1.1 Overview of the company

Company Name – Advait Solution.

Founded - 2019.

## 1.2 Different product

Database Management, Dynamic Website, CMS Development, PHP Based E-Commerce, API Integration, Cloud (Saas, Paas), CRM, Windows Applications.

## 1.3 Capacity of the plant

Company Size – 2- 5 employees.

## 1.4 Scope of work

Advait Solution mission is to enable our clients to uncover actionable insights at enterprise scale. Our vision is to empower the global Advait Solution community with intelligent technology while achieving meaningful experiences and outcomes.

# CHAPTER - 2
# OVERVIEW OF DIFFERENT DEPARTMENT

## 2.1 Overview of Different Department

- **HR Department:** A HR department is tasked with maximizing employee productivity and protecting the company from any issues that may arise within the workforce. HR responsibilities include compensation and benefits, recruitment, firing, and keeping up to date with any laws that may affect the company and its employees.
- **Sales Marketing Department:** A sales and marketing department has the responsibility for deciding where the company should sell and what its pricesshould be. It’s designed to make the life of you and your field sales team easier while increasing productivity and performance.
- **Development Department:** A Development department in different department like Web Development, Android Development, and IOS Development etc. Web development services help create all types of web- based software and ensure great experience for web users. Android app development services comprise design, development, and enhancement of mobile software that runs on all supported Android OS versions. And An IOS developer is responsible for developing applications for mobile devicespowered by Apple's IOS operating system.
- **Testing Department:** Testing is the process of evaluating a system or its component(s) with the intent to find whether it’s satisfies the specified requirements or not. In simple words, testing is executing a system in order to identify any gaps, errors, or missing requirements in contrary to the actualrequirements.

## 2.2 Company Ideology

- **Flexible Hours:** We tend to provide flexible work hours to our employees and believe in friendly environment to maintain work and life balance.
- **Appreciation:** On any level of employees, we love to appreciate their efforts regardless of how small or a big step they take towards it.

- **Values of Ideas:** Every innovative idea deserves a thought on it. Wewelcome our team's idea and value them to give a thought to it.
- **Values of Special Rewards:** We believe in rewarding our team member's efforts with goodies and bonus to celebrate their hard work and clean desire.

# CHAPTER - 3
# INTRODUCTION TO INTERNSHIP

## 3.1 Internship summary

My internship was at Advait Solution. It was on Web development with PHP Laravel framework. While I was there, I performed many different tasks related to Web development from the beginning level. The training was started by learning basic of PHP programming, Javascript, Html, CSS and MySQL and completed by undertaking some hands-on practicals. This internship has affected my growth in several ways, it has helped me in learning related to PHP Laravel framework, and other than that I have also learned many soft skills. The team of Advait Solution has helped me a lot in enhancing my skills. Theyprovide me with pre-made templates and hands-on practicals to learn. I was also a part of a testing team as I have also performed unit testing and functional testing of the Website.

## 3.2 Purpose

An internship provides unique opportunities for learning outside of an academic setting. Internship is to provide real-world experience that enables us to put everything we have learned into action. An internship can help us gain skills that canbe applied to future jobs. In short it give a workplace experience before actually entering the workplace.

## 3.3 Objective

- The main objective of internship is to gain experience in a particular field. However, people can benefit from internship in order to receive industrial experience and develop their skill and expose us in particular filed and industry.
- An objective for this position should emphasize the skill you already possess in the area and our interest in learning more.
- The objective of a web development intern is to utilize his skills and experience in a way that he can secure a challenging and rewarding position as a Web developer in the industry.

The main objective of Laravel Framework is, that it takes the pain out of development by easing common tasks used in the majority of web projects. In Laravel there are sometasks such as authentication, routing, sessions, and caching and many more. Laravel aims to make the development process a pleasing one for the developer without sacrificing application functionality.

## 3.4 Scope

PHP is a general-purpose scripting language, which developed by Danish-Canadian programmer Rasmus Lerdorf in 1994 and it implements in Laravel Framework. There are some other reasons which also increase the scope of PHP Laravel framework. The Method may change, but the architecture will still be used. Nowadays every industries are make or develop a website for their customer for their business.

Laravel is considerably superior to any other web application development platform due to its powerful authentication mechanism and improved cache technology. Laravelappears to be one of the most popular web development frameworks, with numerous advantages for businesses. With all of the benefits of the Laravel framework, it is one of the most versatile code structures for web programming.

## 3.5 Technology and Literature Review

### 3.5.1 Front End: HTML, CSS

- **Hyper Text Markup Language** or HTML is the standard markup language for documents designed to be displayed in a web browser. It can be assisted by technologies such as Cascading Style Sheets (CSS) and scripting languages such as JavaScript. Web browsers receive HTML documents from a web server or from local storage and render the documents into multimedia web pages. HTML elements are the building blocks of HTML pages. With HTML constructs, images and other objects such as interactive forms may be embedded into the rendered page.

- **Cascading Style Sheets** (CSS) is a style sheet language used for describing the presentation of a document written in a markup language such as HTML or XML. CSS is a cornerstone technology of the World Wide Web, alongside HTML and JavaScript.

### 3.5.2 Backend: PHP, Laravel framework

- **PHP** is a general-purpose scripting language geared toward web development. PHP code is usually processed on a web server by a PHP interpreter implemented as a module, a daemon or as a Common Gateway Interface (CGI) executable.

- **Laravel** is a web application framework with expressive, elegant syntax. A web framework provides a structure and starting point for creating your application, allowing you to focus on creating something amazing while we sweat the details.

- **Database: MySQL**

  **MySQL** is an open-source relational database management system (RDBMS). "SQL", the abbreviation for Structured Query Language. A relational database organizes data into one or more data tables in which data may be related to each other; these relations help structure the data.

## 3.6 Internship planning

- **Project Development Approach**

  The software development models are the various processes or methodologies that are being selected for the development of the project depending on the project's aims and goals. There are many development life cycle models that have been developed in order to achieve different required objectives. The models specify the various stages of the process and the order in which they are carried out.

  The selection of model has very high impact on the testing that is carried out. It will define the what, where and when of our planned testing, influence regression testing and largely determines which test techniques to use.

- **Internship Effort and Time, Cost Estimation**

  Total duration of internship was from 20th June 2022 to 09th July 2022. The internship was Six days a week and the daily timing of the internship was Seven hours a day. In The internship there is training, which I have been completed and then at the end of the internship, I have to submit all the tasks completed by me to Guide.

- **Roles and Responsibilities**

  In The beginning of internship my role is attend session of trainer and performpractical task assign by trainer and do assignment for particular task.

### 3.6.1 Plan of Work

Table 3.1 1st Week Work Plan

| | Date | Day | Topic |
|---|---|---|---|
| **1st WEEK** | 20/06/2022 | Monday | Orientation Program , Company tour, Overview of our techinical training. |
| | 21/06/2022 | Tuesday | Desktop setup, Basic of HTMLand CSS(both theory and hands-on) |
| | 22/06/2022 | Wednesday | Introduction to website structure and web development |
| | 23/06/2022 | Thursday | Installation of PHP and Laravel framework |
| | 24/06/2022 | Friday | Introduction Laravel framework and basic optimization |
| | 25/06/2022 | Saturday | Introduction of MVC (Model, View, Class) and Laravel route system |

Table 3.2 2nd Week Work Plan

| | Date | Day | Topic |
|---|---|---|---|
| **2nd WEEK** | 27/06/2022 | Monday | Web Controller, URL Routing |
| | 28/06/2022 | Tuesday | Setup website Templates |
| | 29/06/2022 | Wednesday | Introduction of MySQL and Database |
| | 30/06/2022 | Thursday | Creating Database and Configuration |
| | 01/07/2022 | Friday | Authentication and migration of database |
| | 02/07/2022 | Saturday | Inserting Data through query builder and ORM(Object Relation Mapping) read data |

Table 3.3 3rd Week Work Plan

| | Date | Day | Topic |
|---|---|---|---|
| 3rd WEEK | 04/06/2022 | Monday | ORM delete and updating data |
| | 05/06/2022 | Tuesday | Authenticating data with the web pages to validates |
| | 06/06/2022 | Wednesday | Setup the log in and log out page and admin panels |
| | 07/06/2022 | Thursday | Setup the Brand Page, slider page |
| | 08/07/2022 | Friday | Setup the Contact page, Message page |
| | 09/07/2022 | Saturday | Final Web Development and queries |

# CHAPTER - 4
# IMPLEMENTATION

## 4.1 Implementation Platform / Environment

Visual Studio Software to implement our

project. Front-end: HTML, CSS

Back-end: PHP, Laravelframework

Database: MySQL

## 4.2 Outcomes

- **Sign Up**

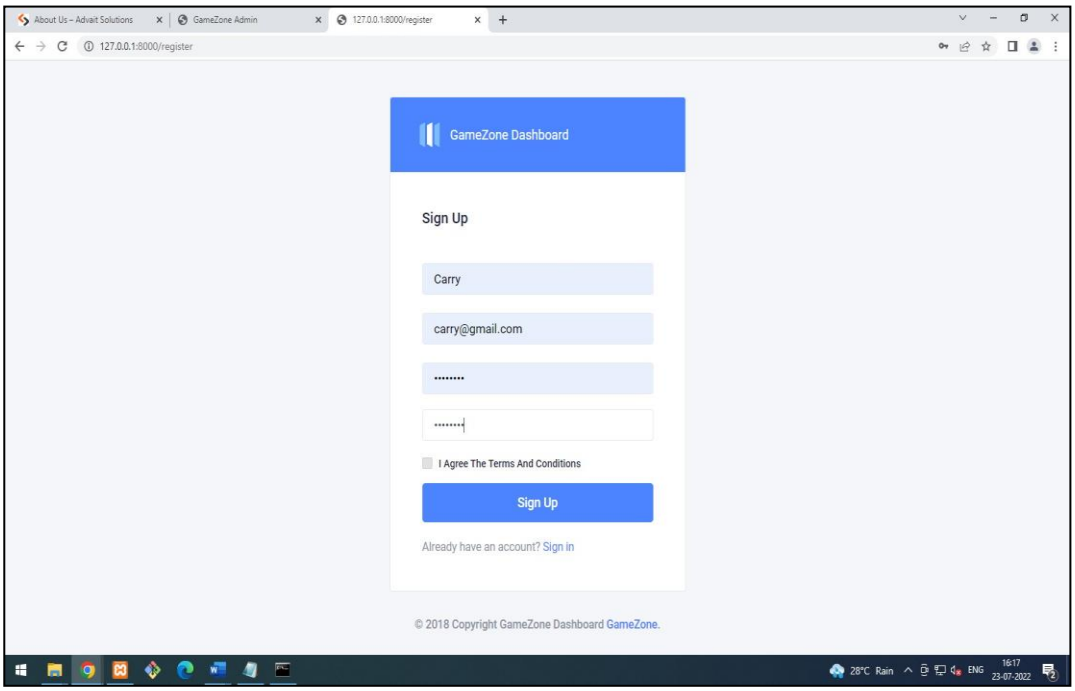

Fig 6.1 Sign Up Page

User will able to Register he/she.

- **Sign In**

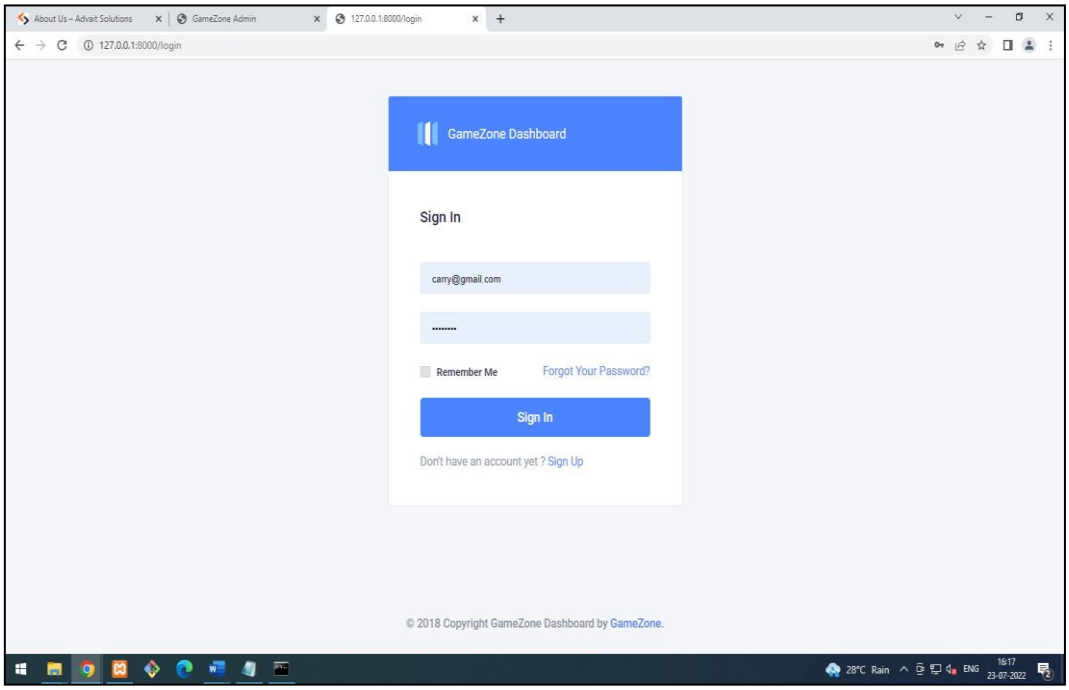

Fig 6.2 Sign In Page

After completion of Registration User can Go to Sign In page for sign In.

- **User's Dashboard**

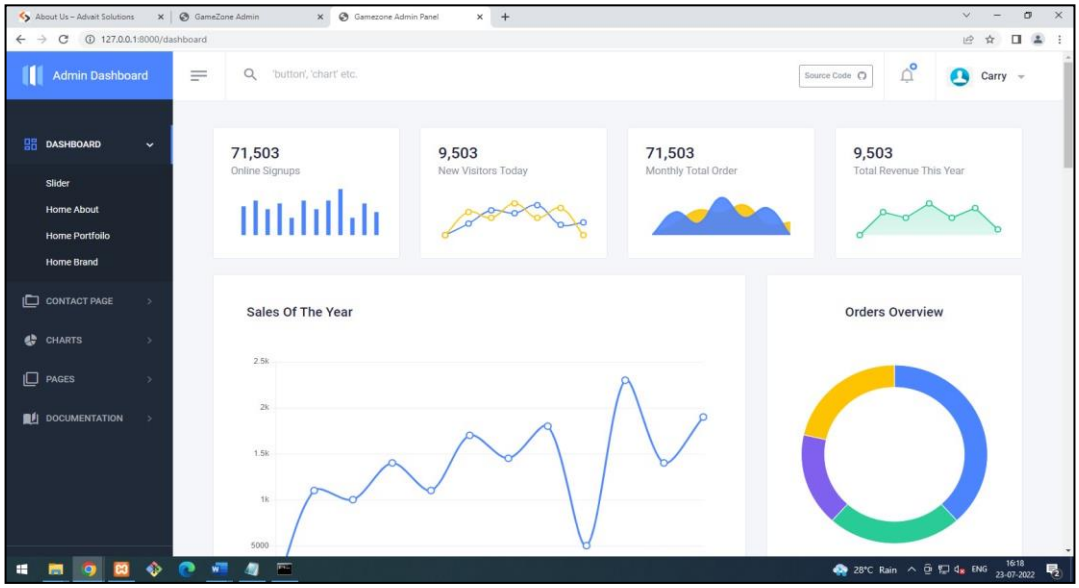

Fig 6.3 User's Dashboard

User Dashboard where user can set brand image or contact message.

- **User Profile Page**

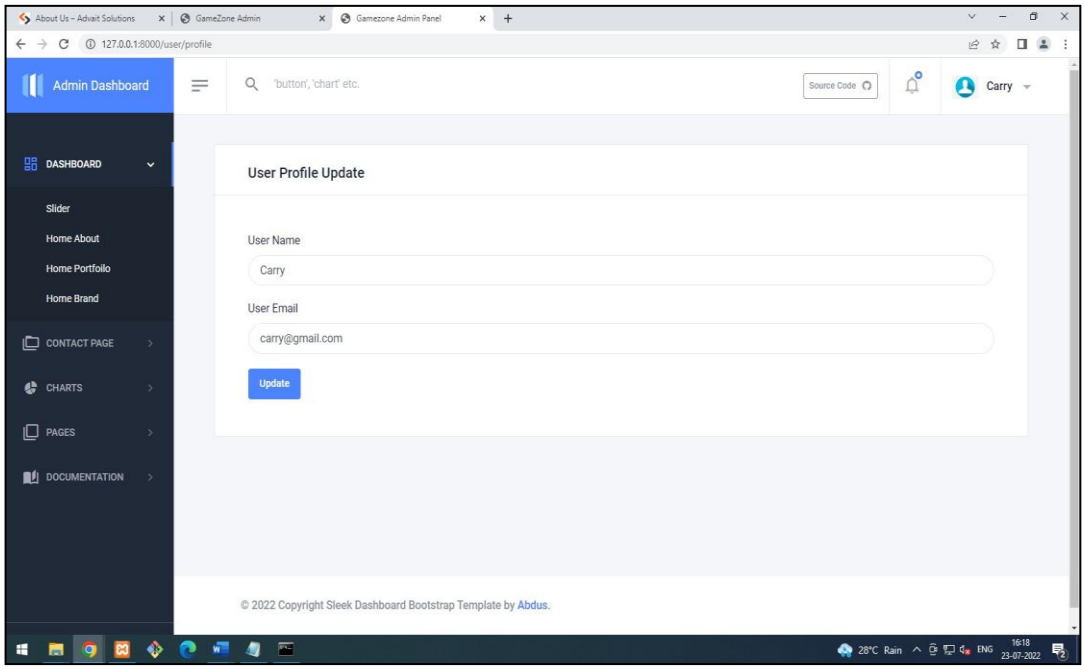

Fig 6.4 User Profile Page

User Profile with user details and they can update their details and can change Name and Email ID.

- **Update Password Page**

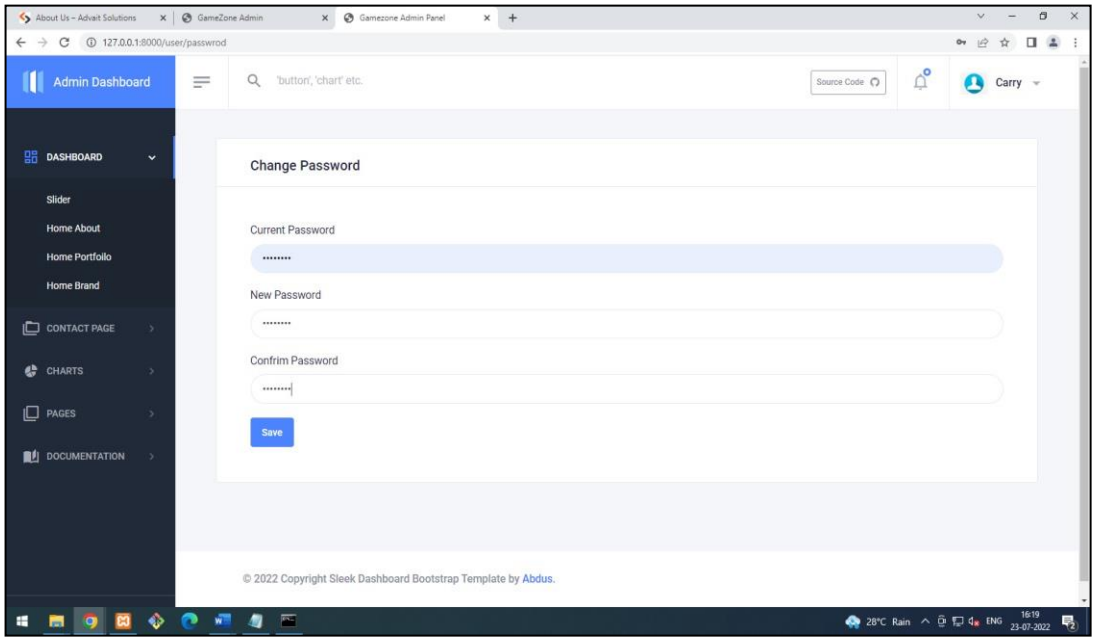

Fig 6.5 User Password Page

User can update Password.

## ➢ CURD Operation

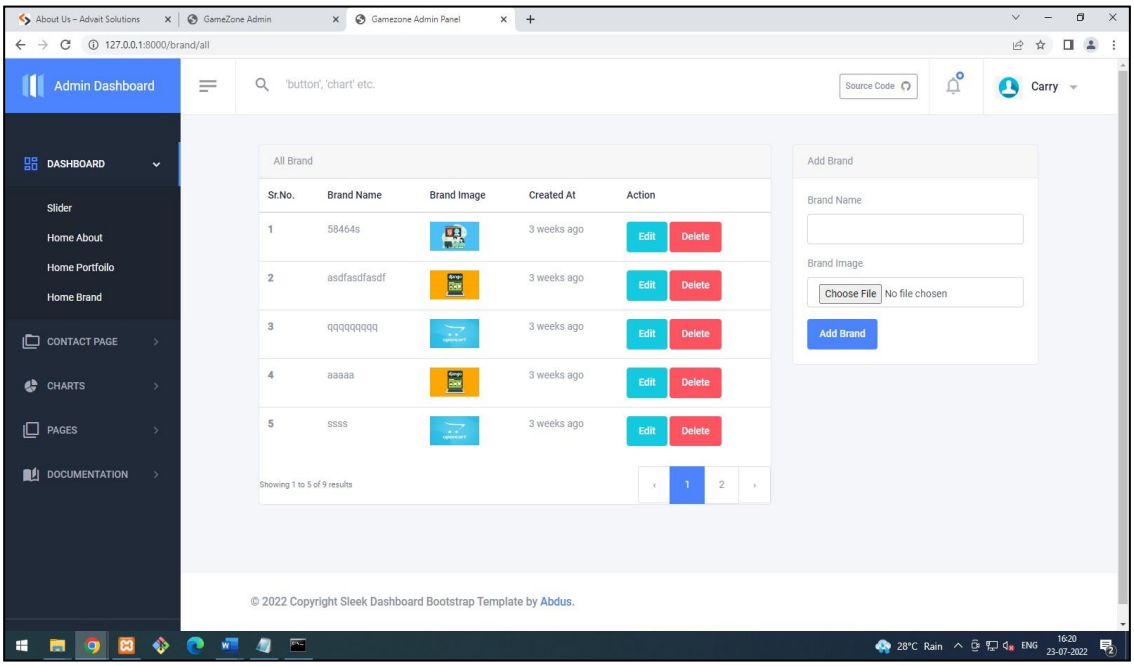

Fig 6.6 Brand Image CURD Operation

User Dashboard where user can insert, update, delete brand image.

## ➢ Contact Details

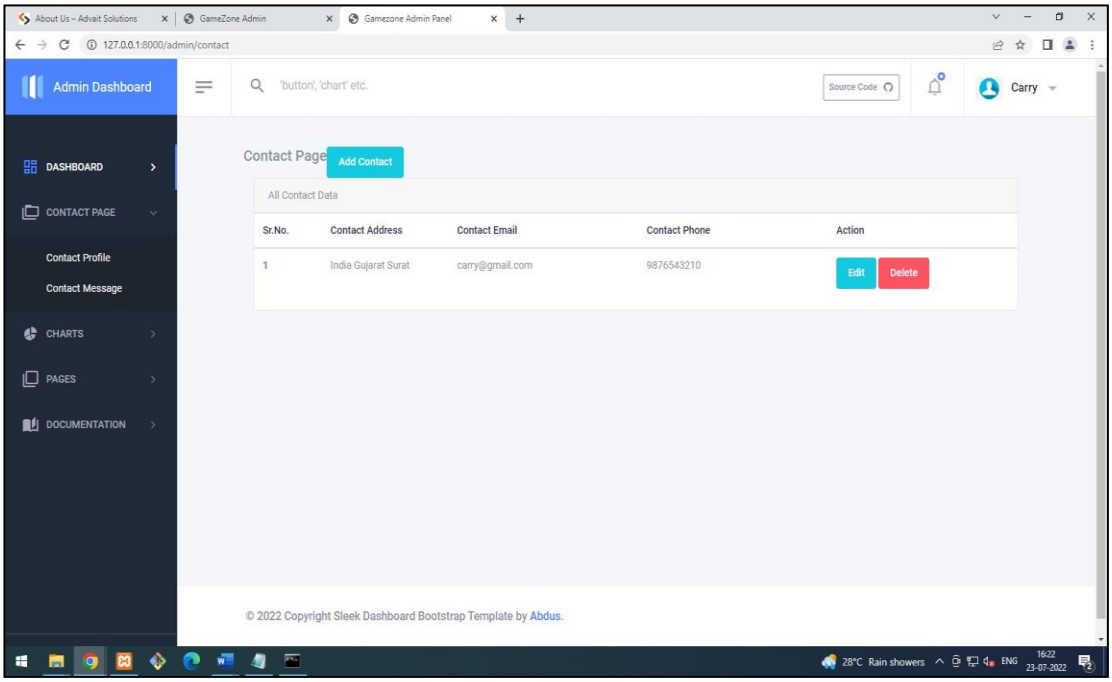

Fig 6.7 Contact Details Page

User can set contact details

- **Database**

User's Database

# CHAPTER - 5
# CONCLUSION AND DISCUSSION

## 5.1 Conclusion

During Internship I have learned lot of things related PHP Laravel framework. Internship at Advait Solution has been excellent experience. It helped me out to enhance and develop my soft skills. In internship I learned PHP Laravel framework and worked as a team was great experience. In Internship I work on Laravel framework, which enhance my knowledge of Web Development. Through the I understand how web sites are develop and how to manage it.

### 5.2 Future Enhancement

In New version of Laravel there will be some new features which make easier for developer to develop a website. Feature of database compatible, security authentication and many more are available in it, which is easy for develop website.
